Troy Hazard

AV Requirements

Troy does not use video. And rarely uses PowerPoint. During the briefing process he will collaborate on content and advise if he will use some picture material in a PowerPoint slide.

His only requirements are

- A wireless, lavaliere microphone
- Two flip charts with new pads of paper
- Two **sturdy** flip chart stands — he will be writing and flipping pages throughout the presentation
- A handheld wireless mic for workshop sessions
- If Troy is facilitating a workshop session, we suggest that the room be set with roundtables in order to encourage and foster dialogue.

Troy likes to move around a lot, so please either position the podium to the side of the stage or remove it altogether. Easily accessible stairs to allow Troy to move among the audience are also requested.
